

# **INCOVERS**

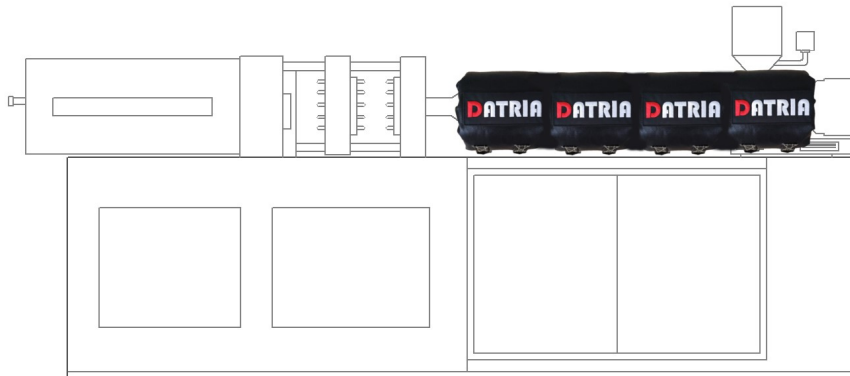

YOUR SOLUTION IS DATRIA INSULATION

**Saving up to 60 % of energy**

**DATRIA**

[www.datria.eu](http://www.datria.eu)

## BENEFITS OF THERMAL INSULATION COVERS

- Significant energy consumption reduction
- Easy and quick installation
- Custom made
- Quick return of investment
- Reduction of ambient temperature
- Dustiness reduction

High temperature  
outer fabric to  
550°C with PTFE  
coating.

Inner glass fabric to 700°C  
reinforced with a steel  
fiber.

Insulating filler from  
ceramic material with  
high density in thickness  
20 mm or 40 mm.  
Thermal conductivity at  
400°C only 0,09 W/mK.

Straps with metal buckles  
for easy and fast  
manipulation.

Insulating filler also available with  
an innovative material Aerogel in  
thickness 10 mm.  
Thermal conductivity at 400°C only  
0,04 W/mK.

## SUITABLE FOR

- Injection machines
- Flat dies
- Moulds
- Extruders
- Furnaces
- ... and more
